

Lots of Options for Multi-Family Plans

JAVA - 2 STORY TOWNHOME

FEATURES

- 1,636 SQ. FT.
- 4 BEDROOM
- 2.5 BATHS
- 2 CAR GARAGE

The Java floorplan is one part of a townhome unit and is our most requested 2 story floorplan modified, the Cyprus, modified to fit the typically smaller lots for townhomes. This plan is flexible and has been designed to fit with another 2 story or ranch unit, our Mocha plan. The Java features 4 bedrooms, or 3 with a bonus room over the garage, and 2.5 bathrooms. The living room has a vaulted ceiling and an open concept living, dining and kitchen area. The master is conveniently located on the main level and utilizes the space

under the stairs for additional room in the master walk-in closet. The bedrooms upstairs feature oversized or walk-in closets and are generous in size. The Java is a well thought out plan which can offer affordable family living in a great package.

If you have a lot and are looking to build a duplex, tri-plex or connected townhomes, we can help you design units that look good and live great!
